

CONTENTS

<i>S.No.</i>	<i>Chapter</i>	<i>Page No.</i>
1.	Importance of Biochemistry	1-3
2.	Water	4-9
3.	Carbohydrates	10-21
4.	Lipids	22-29
5.	Proteins	30-45
6.	Enzymes	46-59
7.	Nucleic Acids	60-68
8.	Biological Oxidation and Metabolism of Carbohydrates	69-83
9.	Metabolism of Lipids	84-89
10.	Concepts and Applications of Plant Biotechnology	90-91
11.	Tissue Culture	92-106
12.	Micropropagation	107-114
13.	Embryo Culture	115-121
14.	Somaclonal Variation	122-126
15.	Cryopreservation	127-133
16.	Introduction to recombinant DNA Technology	134-149
17.	Transgenics and their Significance in Crop Improvement	150-153
18.	Polymerase Chain Reaction	154-156
19.	Genetic Markers	157-160
20.	Marker Assisted Breeding and its Significance in Crop Improvement	161-163
21.	Biotechnology Regulations	164-168
